

MARITIME SECURITY SERVICES

SAFETY MANAGEMENT SYSTEMS, LLC

Ship and port security regulations pose new challenges to every company operating within our national borders and beyond.

Safety Management Systems, LLC has been recognized as a leading provider of compliance services to the maritime industry since 1996.

Serving as trusted advisors to ship owners and managers, terminal and stevedoring operators, and maritime training centers, SMS has provided practical answers to challenges relating to safety and risk management, environmental and quality initiatives, and now - maritime security.

Experience, values and customer-focused client services set SMS apart.

- *Maritime professionals with merchant marine and United States Coast Guard experience.*
- *Effective project managers dedicated to achieving results that exceed expectations.*
- *Currently performing ship security assessments and developing ship security plans for a range of ships from LNG and chemical tankers to general cargo and PCCs.*

All consultants have completed Maritime Institute for Training and Graduate Studies (MITAGS) Ship Security Officer / Company Security Officer training and have extensive shipboard auditing, inspection and training skills and experience.

SMS personnel produce documentation that is effective, concise and mindful of its intended readers.

SMS employs objective risk assessment methodologies to determine practical and feasible solutions to the unique set of challenges posed by maritime security.

Your compliance team

Where to Begin

If timely compliance with regulations is important to your business, consider the advantages of working with a trusted advisor who can get the job done effectively and efficiently.

Contact SMS to discuss your immediate concerns and to request a quotation for a compliance solution that fits the needs of your company, ships and facilities.
