

**SAFETY MANAGEMENT IS
OUR BUSINESS. WHAT'S YOURS?**

SMS DELIVERS BEST IN CLASS EXPERTISE AND PRACTICAL SOLUTIONS TO ENHANCE EFFICIENCY

SAFETY MANAGEMENT SYSTEMS, LLC

SMSLLC originated as a firm to support development, implementation and auditing of management systems developed in support of safety, quality and environmental objectives. Over time, we've expanded our service offerings in the areas of maritime security, operational and risk assessment, and assorted program development. Professional mariners with experience within other industries and consultancies provide services to a broad public and private sector client base. Services range broadly on various projects, though may be categorized as:

- Regulatory Advisement
- Internal Auditing
- Risk Management
- Management Systems

- > SeaBulk Tankers
- > Seacor
- > TYCO
- > Waterman Steamship

YOUR IMPROVEMENT TEAM

SMSLLC has assisted maritime and related transportation industry clients since 1996 to solve challenges tied to operations, compliance, improvement and organizational effectiveness.

SMSLLC is a consulting group with a commitment to assist clients to arrive at solutions that are practical, sustainable and that leverage existing best practices and organizational strengths to the fullest. *What makes SMSLLC the leading provider of consulting services to the maritime and transportation sector?*

ACCOUNTABILITY

We are a small firm. Clients receive the focus, attention and continuity they deserve by working with a dedicated project team from start to finish.

We may be small, but we are not tiny. Solo practitioners may be too limited to provide the experience, availability and risk management afforded by a more developed and larger professional staff. Smaller organizations demand broader accountability and each consultant is directly responsible for his or her results.

SMSLLC uses subcontractors sparingly and only as approved by clients to provide specific subject matter expertise when necessary.

EXPERIENCE

Since 1996 we've been serving maritime operators throughout the U.S. and abroad. Our consultants' collective experience benefits each of our clients through proven and practical approaches and solutions.

We recognize that no two organizations are alike and even similar problems may have divergent solutions. SMSLLC has addressed a broad array of challenges within public and private sector vessel operations.

COMMUNICATION

The success of our relationships begins with the ability of our consultants to not only listen, but to hear what clients are asking for. Success continues by frequent and clear reporting on project status, challenges and deliverables from the designated lead consultant.

Prompt response to questions and concerns builds our clients' trust and assurance that project deliverables will always match expectations.

IT'S ABOUT PEOPLE

Within any organization, it is the culture, attitudes and motivation of people that make success achievable.

SMSLLC believes it must earn trust within its clients' project teams. Our consultants are personable professionals that form relationships to effect change in a collaborative, teaming atmosphere.

"Thanks to all of you we are moving ahead on numerous beneficial changes to our operations..."
